PROFESSIONAL STATEMENT

Aspiring software developer with experience building full-stack web applications and backend systems using **Python, PHP/Laravel, and Java**. Currently completing a **Master of Information Technology (GPA 6.50/7.00)** with strengths in algorithms, system design, and object-oriented programming. Proficient in clean coding, version control, and agile collaboration. Brings five years of financial services experience, offering transferable skills in **project delivery, stakeholder communication, and cross-functional teamwork**.

TECHNICAL SKILLS

- **Languages/Frameworks:** Python, Java, PHP/Laravel, JavaScript, HTML5, CSS3, SQL, PostgreSQL, MongoDB, Kotlin, Golang
- **Tools/Practices**: Git/GitHub, Agile/Scrum, MVC Architecture, UML, Unit & Feature Testing
- **Core Competencies**: Algorithm Design, Data Structures, Full-Stack Development, System Design

EDUCATION

Griffith University Jul'24 - Jun'26 (Expected) **Gold Coast, QLD**
Master of Information Technology, Major in Software Development *GPA: 6.50/7.00*
(Awarded the Student Academic Excellence Scholarship)

- **Full Stack Web Application:** Developed an event booking website for organizers and attendees using **PHP/Laravel** and **LiteSQL**. Implemented **Breeze Scaffold authentication**, database **migration with seeding**, and **CRUD operations**. Designed a responsive UI with **HTML, CSS, and JavaScript**; prepared feature testing for QA.
- **Object Oriented Programming:** Creating a **Tetris clone in Java** using encapsulation, inheritance, and polymorphism within **MVC architecture.** Enhanced gameplay with **AI play mode**, **two-player functionality**, **dynamic sizing**, **JSON-based scoring**, and **external server integration**, while collaborating via **Git-based version control**.
- **Python Development :** Built **backend tools** utilizing **data structures, control flow, and file operations**, with a strong focus on **systematic debugging** and **code reliability**.
- **Data Structure and Algorithm:** Benchmarked sorting algorithms (merge, heap, selection) across varied datasets; developed an optimal route calculator using **Dijkstra's algorithm** considering toll and distance factors.
- **Mongo DB project:** Designed **document-oriented schemas** and implemented **multi-stage aggregation pipelines** to filter and rank top-rated movies, optimising performance with indexing and advanced query operators.
- **Application System Design:** Designed a modular Smart Home Automation System using **UML** and **use case analysis**; defined functional and non-functional specifications for a scalable, secure architecture.

State University of New York at Geneseo Aug'15 - Dec'18 **New York USA**
Bachelor of Science in Accounting, School of Business AACSB Accredited *GPA: 3.63/4.00*
(Awarded the Student Academic Excellence Scholarship)

- Earned membership in national honour societies: **Beta Gamma Sigma, Golden Key, Phi Eta Sigma**.

PROFESSIONAL WORK EXPERIENCE

Insight Business Analytics
IT Business Analyst Intern Nov'24 – Feb'25 **Gold Coast, QLD**

- Analysed requirements to design a **scalable data system** tailored for healthcare and research environments.

- Collaborated with cross-functional teams to ensure **data integrity**, system **usability**, and **alignment** with client objectives, reinforcing understanding of **SDLC** and **technical documentation** practices.

Citibank, N.A., Tokyo Branch

Associate Product Manager / Solution Sales Assistant Jun'18 – Jun'24 **Tokyo, Japan**

- **Led a payment system upgrade** that enhanced **transaction speed and reliability**, coordinating with **global teams** and **technical vendors** in an **Agile environment** to deliver upgrades on schedule.
- Ensured compliance with **Japanese financial regulations** by evaluating sanction handling procedures and communicating critical operational updates to **2,500+ clients.** Strengthened stakeholder communication, risk analysis, and data integrity awareness.
- Conducted **data analysis** to forecast pricing models and developed a **product roadmap**. Achieved a **10% revenue increase** while optimising operations through structured planning and data-driven decision-making.

Deloitte Tax LLP

Corporate Tax Intern Jun'17 – Aug'17 **New York, USA**

- Processed and analysed multi-state tax data using **Excel** and **Corptax**, applying logic and pattern recognition to ensure data accuracy.
- Performed **quality assurance checks** and collaborated with clients to clarify complex regulatory requirements, strengthening data validation and professional communication skills.

RELEVANT PROJECTS

QUT Code Network Jul'25 – Current **Brisbane, QLD**

- Collaborating on a **Todoist Clone** using **Golang** and **PostgreSQL**, focuing to **API development** and **database schema design** in an Agile GitHub-based workflow.

QUT Hackathon – "Best First Year" Award Aug'25 **Brisbane, QLD**

- Built a **time-capsule memory system in React**, encrypted to unlock on countdown completion.
- Designed a **custom SVG typewriter keyboard**, blending **nostalgia with modern UX**.

Griffith Coding Club Jul'24 – Current **Gold Coast, QLD**

- Learning **Kotlin fundamentals** and practising **competitive programming techniques** such as **two-pointer** and **sliding window algorithms, hashing, Graph** to improve problem-solving efficiency.
- Participated in **ICPC** competitions.

Full Stack Web Development (Udemy Course) Oct'24 – Current **Online**

- Built a **responsive multi-page portfolio website** using **HTML5, CSS3, Flexbox, CSS Grid, and Bootstrap**, optimised for mobile and desktop deployment.

VOLUNTEER EXPERIENCE

Griffith University GC Society for Technologies and Statistics (GUSTS)

Treasury, Founding Member Oct'24 – Jul'25 **Gold Coast, QLD**

- Co-founded a student tech society focused on **industry networking with professionals in software development and data science**; led outreach initiatives, coordinated administration, and helped define the club's mission and structure.
